Dataspire is committed to achieving Net Zero Emissions by 2050.

We are aware that reducing our Greenhouse Gas Emissions represents significant benefits for us, our customers, suppliers and the wider community.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022	
Additional Details relating to the Baseline Emissions Calculations.	
Baseline emissions were recorded for year ending July 2022 and produced in accordance with GHG Protocols for scopes 1,2 & 3. The inventory includes all measurable Scope 1 & 2 emissions and the following Scope 3;	
<ul style="list-style-type: none"> • Travel • Procurement • Waste & Water • Distribution (Upstream) • Distribution (Downstream) • Emissions from Fuel & Energy 	
Baseline year emissions:
