

Streamlining Your IT Procurement

Think Digital Education, Think Digital Transformation, Think Dataspire!

Streamlining IT Procurement for a Consistent Learning Experience

Balancing the needs of each school with dozens of staff, hundreds of students, and just as many devices, providing a seamless and consistent teaching and learning experience is challenging. With limited technical resources and budget constraints, keeping everything running smoothly can feel like an uphill battle.

Dataspire's Managed Procurement Service streamlines IT purchasing across your school, empowering you to achieve this goal effectively and efficiently.

We offer a single online platform where your school can meet all IT purchasing requirements. This platform is designed exclusively for you and removes the hassle of dealing with various buying systems with various processes, solutions and services.

This means your school can access the best selection of IT at the best price enabling you to reallocate valuable resources, foster innovation and drive academic success across your learning community.

A Streamlined Approach to IT Procurement

How it Works

Discovering

Our team collaborates closely with you to understand your current IT infrastructure, future needs, and strategic objectives. This comprehensive assessment provides the foundation for a tailored procurement plan that aligns with your School's overall goals.

Defining

Through a wealth of industry expertise, our established partnerships with technology vendors, and economies of scale – gained by supporting hundreds of schools and academies nationwide – we will curate a list of solutions and suppliers that best meet your school's specific requirements (and the DfE's Digital and Technology Standards) while securing the most competitive rates. This translates into significant cost savings and enhanced value for your investment.

Designing

We will develop a customised portal, tailored specifically to your School's unique needs and branding. This centralised platform will serve as a hub for all IT procurement, enabling straightforward device and solution selection by your colleagues.

Delivering

Our experienced team will provide stress-free delivery and seamless integration of your chosen devices and solutions, ensuring a consistent teaching and learning environment for your school.

Improving Overall School Performance

Moving from the same starting point, the Datspire Procurement Portal enables you to create symmetry across your entire learning community while delivering a multitude of benefits that enhance teaching, learning, and overall school performance.

For Your School:

Saving Money

Economies of scale and strategic partnerships with technology providers enable significant cost reductions and optimised resource allocation.

Uniformity

Standardised devices across your school ensure consistent user experiences, simplify deployment, and foster accountability.

Reducing Teacher Workload

With a specific catalogue of solutions, the procurement portal eliminates the need for extensive training and troubleshooting, freeing crucial teaching/learning/planning time.

Successful Sustainability

Datspire takes care of device recycling and disposal, reducing environmental impact and safeguarding your school's commitment to sustainability and data security.

A Joined-Up Approach

Streamlined procurement processes and seamless integration facilitate the efficient deployment of services, solutions and systems.

Financial Predictability

Value-driven procurement strategies and transparent reporting ensure financial accountability and optimised spending.

Saving Time

Through our direct relationship with the DfE managing multi-million-pound contracts and automated procurement processes, we eliminate the need for multiple quotations and tendering, saving valuable time and resources.

Assurance

High-quality equipment and a standardised approach ensure that your learning community meets and maintains the highest standards.

For Your Teachers:

Anywhere-Anytime Access

Unified device specifications enable seamless access to your network and systems across multiple sites, fostering flexibility and uninterrupted teaching.

Saving Time

A centralised portal with simplified device selection and a standardised procurement process, ensures teachers have the tools they need quickly and efficiently.

Increased Collaboration

Standardised devices promote a wider resource pool, enabling collaboration and knowledge sharing among teachers.

A Device for Every Teacher

Eliminating the hassle of waiting for device availability, every teacher has access to the same high-quality devices.

More Lesson Time

Device compatibility ensures that teachers can easily display their content on any screen across the school, maximising lesson time and minimising technical disruptions.

Personalisation

With a specific selection of devices and accessories, teachers can tailor their teaching tools to suit their unique teaching styles and preferences.

For Your Students:

Equal Opportunities

All students have the same access to technology resources, regardless of your school's location or background.

Innovation-Driven Learning

Standardised devices encourage collaboration and exploration, fostering a 21st-century learning environment.

Future-Proof Education

A robust and consistent IT infrastructure empowers students to develop digital literacy skills and thrive in an increasingly technology-driven world.

Managing Your IT Procurement

Because each school is unique with its own set of practices and values, the Procurement Portal is bespoke with the flexibility to be as hands-on or hands-off as you need.

We offer 2 tiers of support:

Option 1: A platform for the ordering and delivery of ICT equipment.

Support will include:

A dedicated account manager to follow up on orders and delivery updates, as well as portal support for accounts, stock management and returns.

Option 2:

Support will include:

Everything in Option 1 plus a white glove service for the unboxing and imaging of devices before arrival onsite and handover to your IT support team.

Dataspire's Managed Procurement Service will unlock the true potential of technology to transform your school into a beacon of excellence in teaching, learning, and innovation.
